Petrol Engine Full Synthetic Top-Up Oil

In daily stop/start driving it is not uncommon for modern engines to consume a small amount of engine oil. Nulon Full Synthetic Top-Up Oil has been formulated to be used specifically in top-up applications where a full synthetic petrol engine oil is recommended. The advanced formulation promotes engine cleanliness and is compatible with a wide range of modern petrol vehicles.

Benefits

- High protection full synthetic formulation
- Compatible with all brands and types of engine oils
- Keeps your engine clean and prevents sludge formation
- Suitable for vehicles requiring the following viscosities:
  - 5W-30
  - 5W-40
  - 10W-30
  - 15W-40

Directions for use: Add Nulon Top-Up engine oil to your engine when a top-up is required. Follow your vehicle’s owner’s manual for instructions. This product is designed for use in top-up applications between recommended oil change intervals. If a complete engine oil service is required visit nulon.com.au for engine oil selection.
