

Fuel Stabiliser & Algae Killer

This dual purpose product is specifically formulated to eliminate and prevent the growth of a range of algae in petrol, E85, diesel and biofuel systems. Nulon Fuel Stabiliser & Algae Killer stabilises fuel, preventing the fuel from going stale during storage and prolonged periods of inactivity, eliminating the need to drain the fuel tank (before or after storage).

Benefits

- Cleans Fuel System
- Eliminates & stops algae growth also commonly referred to as:
 - Fuel bug
 - Algae
 - Yeast
 - Mould
 - Microbial contamination
- Stabilises Petrol & Diesel fuels for storage

Directions for use

Directions for use

Simply add Nulon Fuel Stabiliser & Algae Killer to your fuel tank at the recommended treatment rate (shown below).

Treatment Rate:

TREATMENT	TREATMENT RATE
Preventative maintenance	1ml per Litre of fuel
Blocked injectors or fuel system	2ml per litre of fuel
Algae elimination	4ml per litre of fuel

HOW TO USE MEASURING CHAMBER:

Loosen cap on measuring chamber (only) just enough to allow air release (around half a turn). Squeeze bottom of bottle to push fluid into the measuring chamber, releasing bottle once fluid reaches desired dosage. Then remove cap from measuring chamber and pour fluid into fuel tank. Replace cap and tighten for storage.
